

SMBC Aviation Capital

Client: SMBC Aviation
Main Contractor: MAC- Group
M&E Contractor: Riverside Mechanical Ltd

Riverside Mechanical installed HVAC Services for the fit out works over 2 floors and 3 phases of SMBC Aviation IFSC House, IFSC, Custom House Quay, Dublin.

The Project features an open plan office space, cellular office space, new canteen with feature walls and executive board rooms.

Full Mechanical Services Package was installed, including LPHW Heating System, Cooling System, Water, Waste, Ventilation & BMS Controls

With the restricted nature of the location of the project, deliveries, offloading and crange was one of the more obvious challenges on this project. Good planning and co-ordination were implemented considering the general public, road closures and existing services.
